- **Nera** (conversational agent)

Development Team

Serbia
Hungary
Egypt
Turkey

- 20+ years in software & product leadership

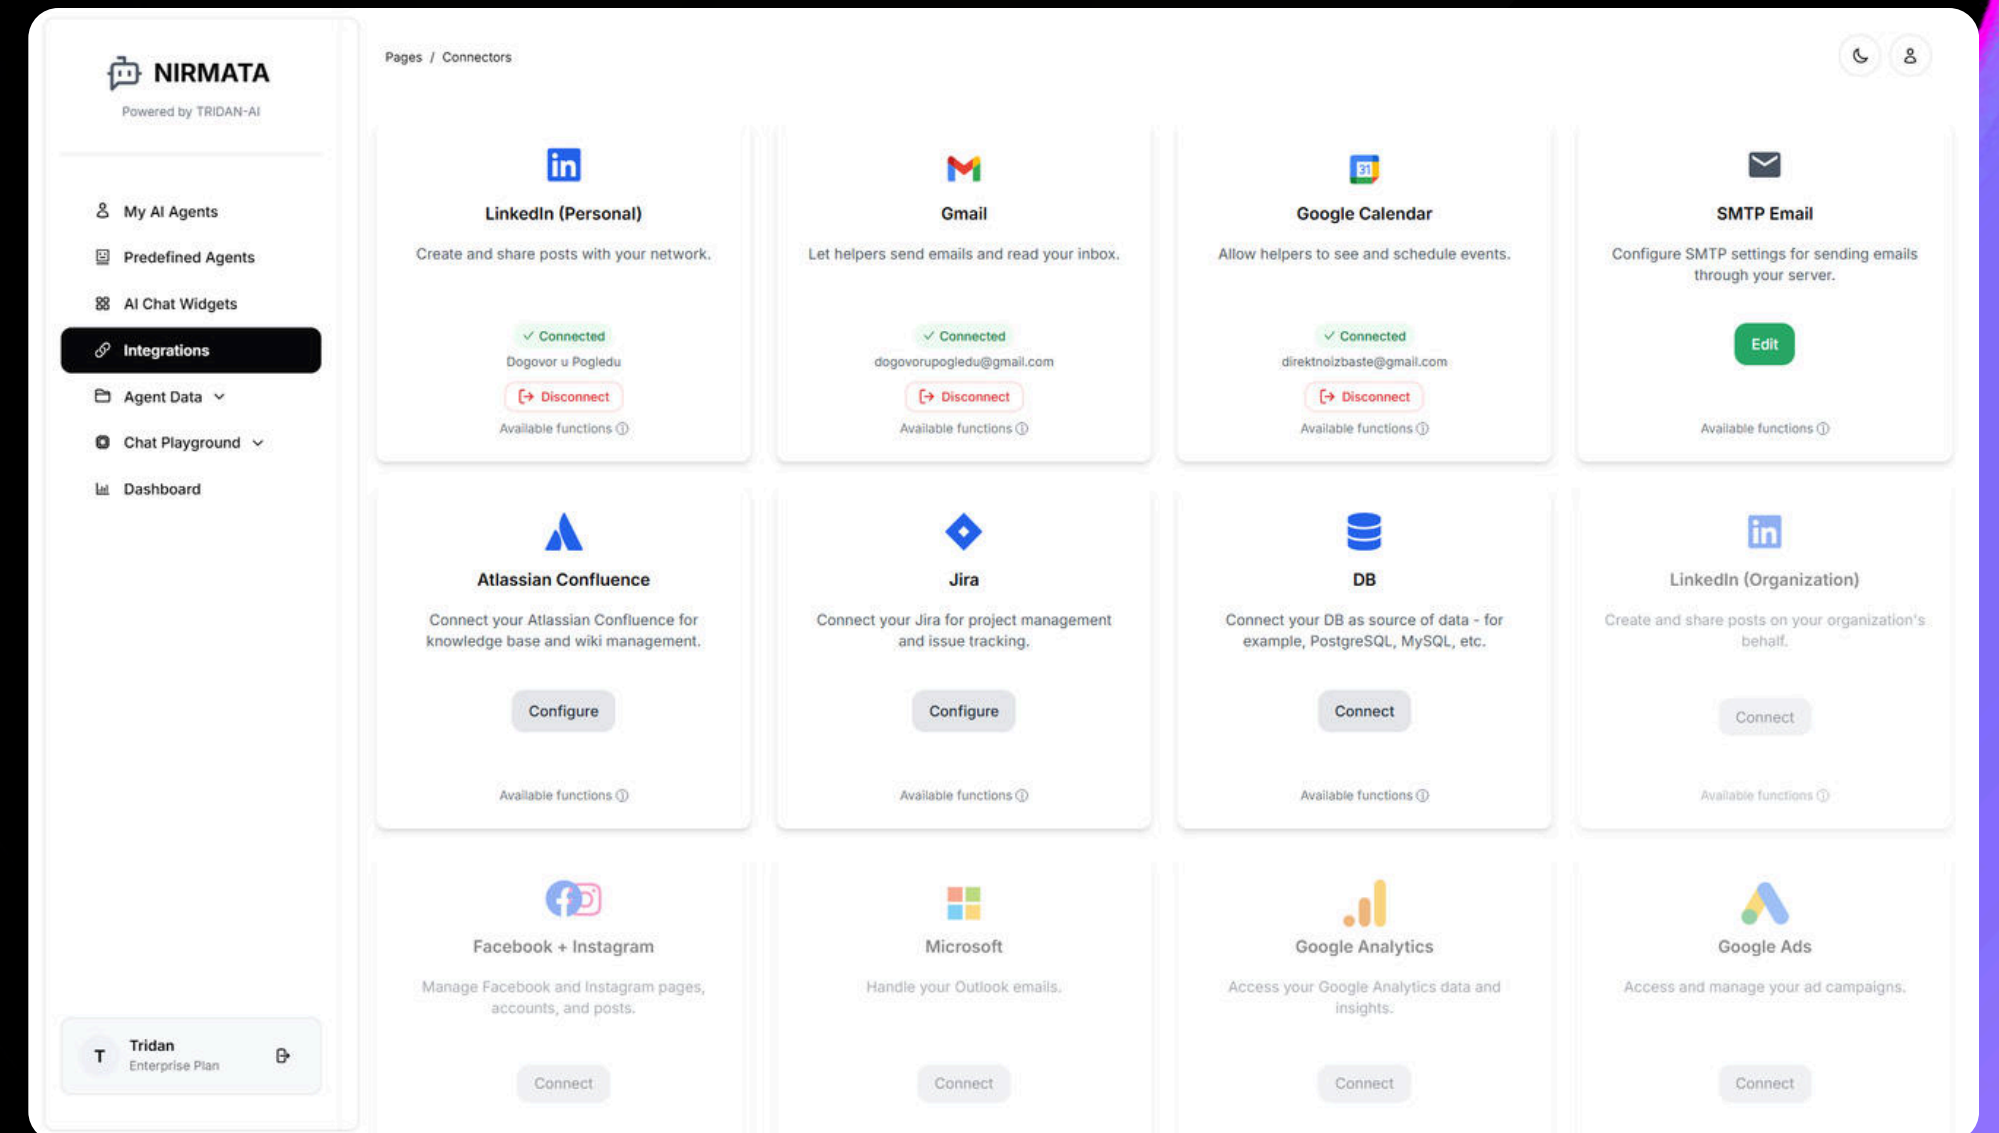

- 10+ years in project management

- 3+ years in AI-driven solution

Nirmata

Agentic platform on your infrastructure

Nirmata is a platform for building and managing smart AI agents trained on your business knowledge and tools.

Create unlimited AI agents that support your business

Full Customization

GDPR and CCPA, PII Compliance

Integrate AI agents with your services

Google, Outlook, CRM,
DB, Slack, Teams, Norton,
Atlassian, etc

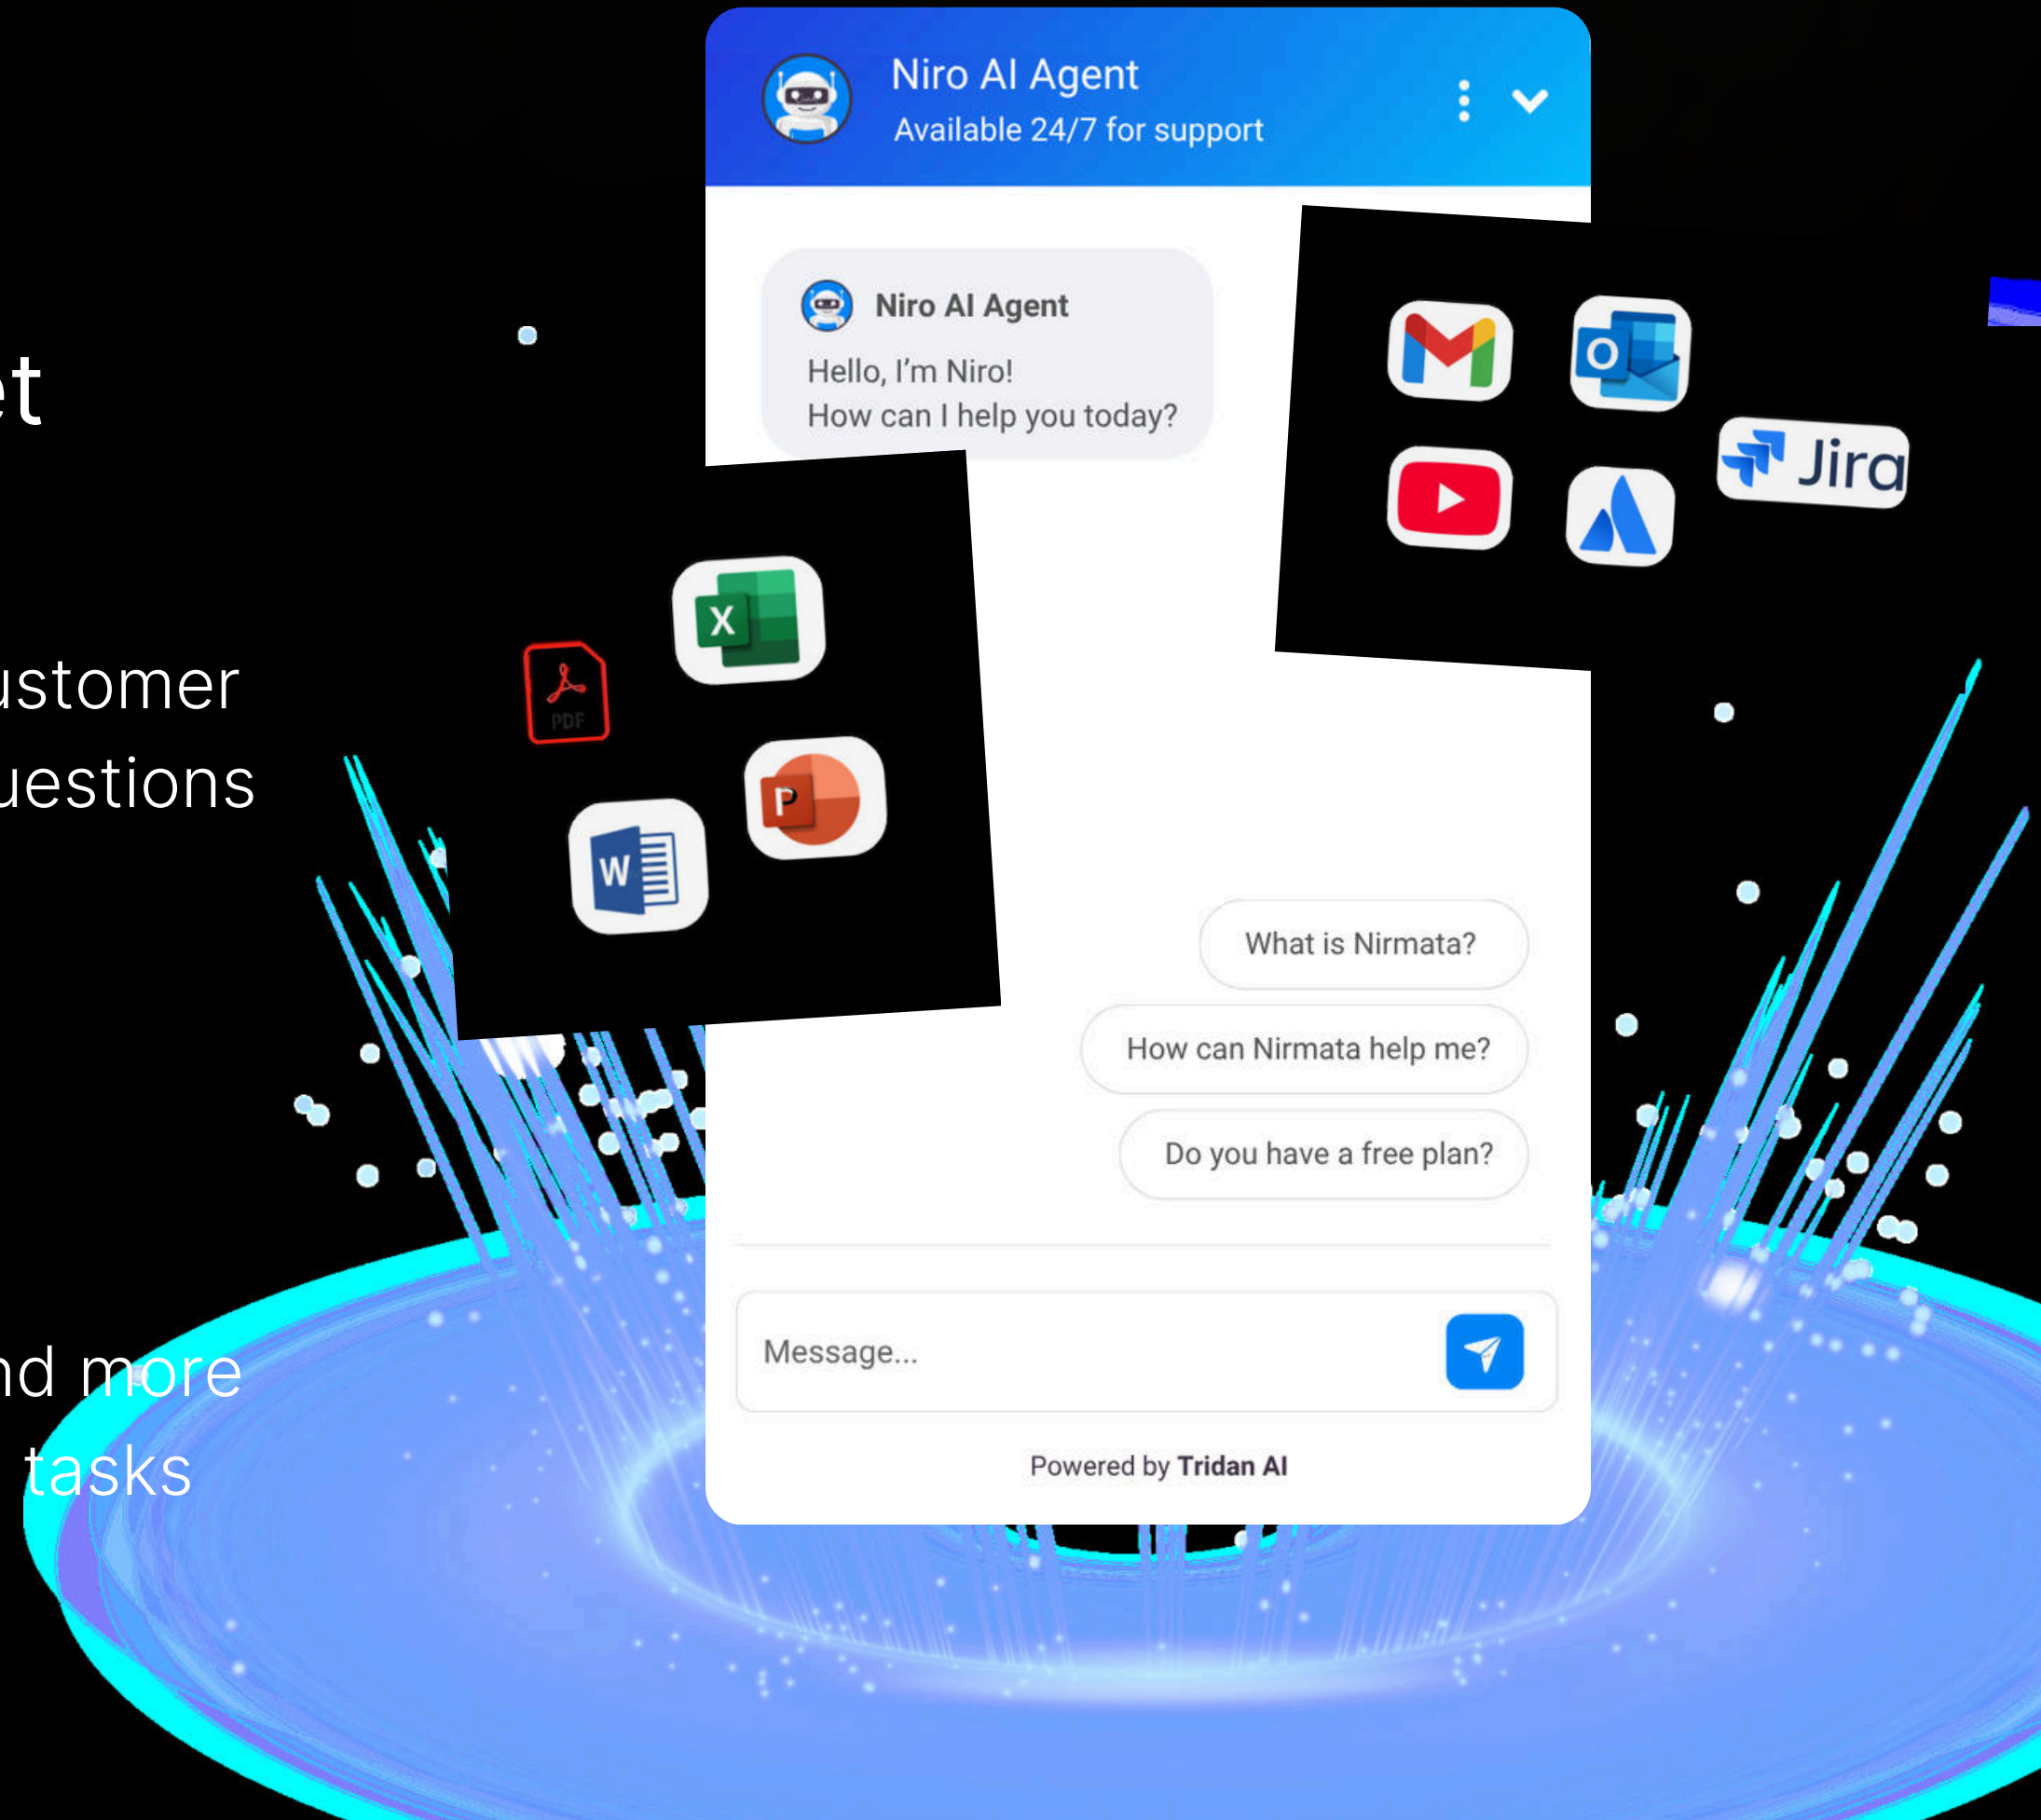

Niro

Support, Help & Sales Widget

Niro is our chat widget that automates customer support, helps with sales, and answers questions 24/7.

Key features:

- Trained on your docs & tools
- Integrates with Outlook, Gmail, Jira and more
- Automates 70% of FAQ and repetitive tasks

Nera

Voice Conversational Support Agent

Nera is a **conversational customer voice support agent** that understands, speaks, and solves real customer problems - without human intervention.

The agent is seamlessly connected to relevant data sources, enabling it to resolve issues autonomously. When a problem exceeds the agent's defined scope, it automatically generates a support ticket and escalates the case to a human representative.

Let's Talk.

We're looking for the right partners to grow and build what's next in AI.
